

**Wedding Album
Bespoke
Design Service**

2024/2025

It's so easy to get caught up in planning your wedding day that printing or framing your wedding photos can be a bit of an afterthought, and not something you typically consider when compiling your 'must-have' list. You spend thousands of dollars on your wedding day, and the photos are usually all you have to remind you of your special day, so wouldn't you want to print your memories too?

That's why I offer a wedding album service to take the stress out of creating a wedding album by handling the entire process for you.

WHY CHOOSE ME?

- Professional design: You will choose your most favourite photos and I will create a beautiful and cohesive design for your album. This can save you time and stress by eliminating the need for you to design the album yourself.
- High-quality printing: Your wedding album will be printed by Queensberry, a New Zealand owned and operated high-quality printing house. They use materials and techniques to create a durable and long-lasting album. This saves you the hassle of finding a printing service and worrying about the quality of the final product. And the bonus? They ship worldwide!
